How to Remove Skunk Smell from a Dog

the best skunk odor remover recipe

1 quart of 3% hydrogen peroxide

¼ cup baking soda

1 teaspoon of strong liquid dish soap such as Dawn

Mix the ingredients in an open bucket or bowl. The mixture will fizz. Wet your dog and massage the solution into the coat with a washcloth or a sponge.

Be sure to keep the mixture out of the dog's eyes, nose, and mouth.

Waite 10-15 minutes, then bathe the dog as usual.

Warning:

This mixture can be explosive, as it will fizz and creates pressure if it is enclosed in a seal-tight container. Be sure to only mix in an open container and do not try to store or cover it in any way. Do not get the mixture into the dog's eyes, nose or mouth.
